PRACTICALLY SIZED

The **YEYIAN Hussar Micro ATX Gaming PC Case** is our micro ATX-sized juggernaut for gamers who need a smaller form-factor and practical space without sacrificing the standard gaming rig options they expect.

INCLUDES A 120 MM FAN

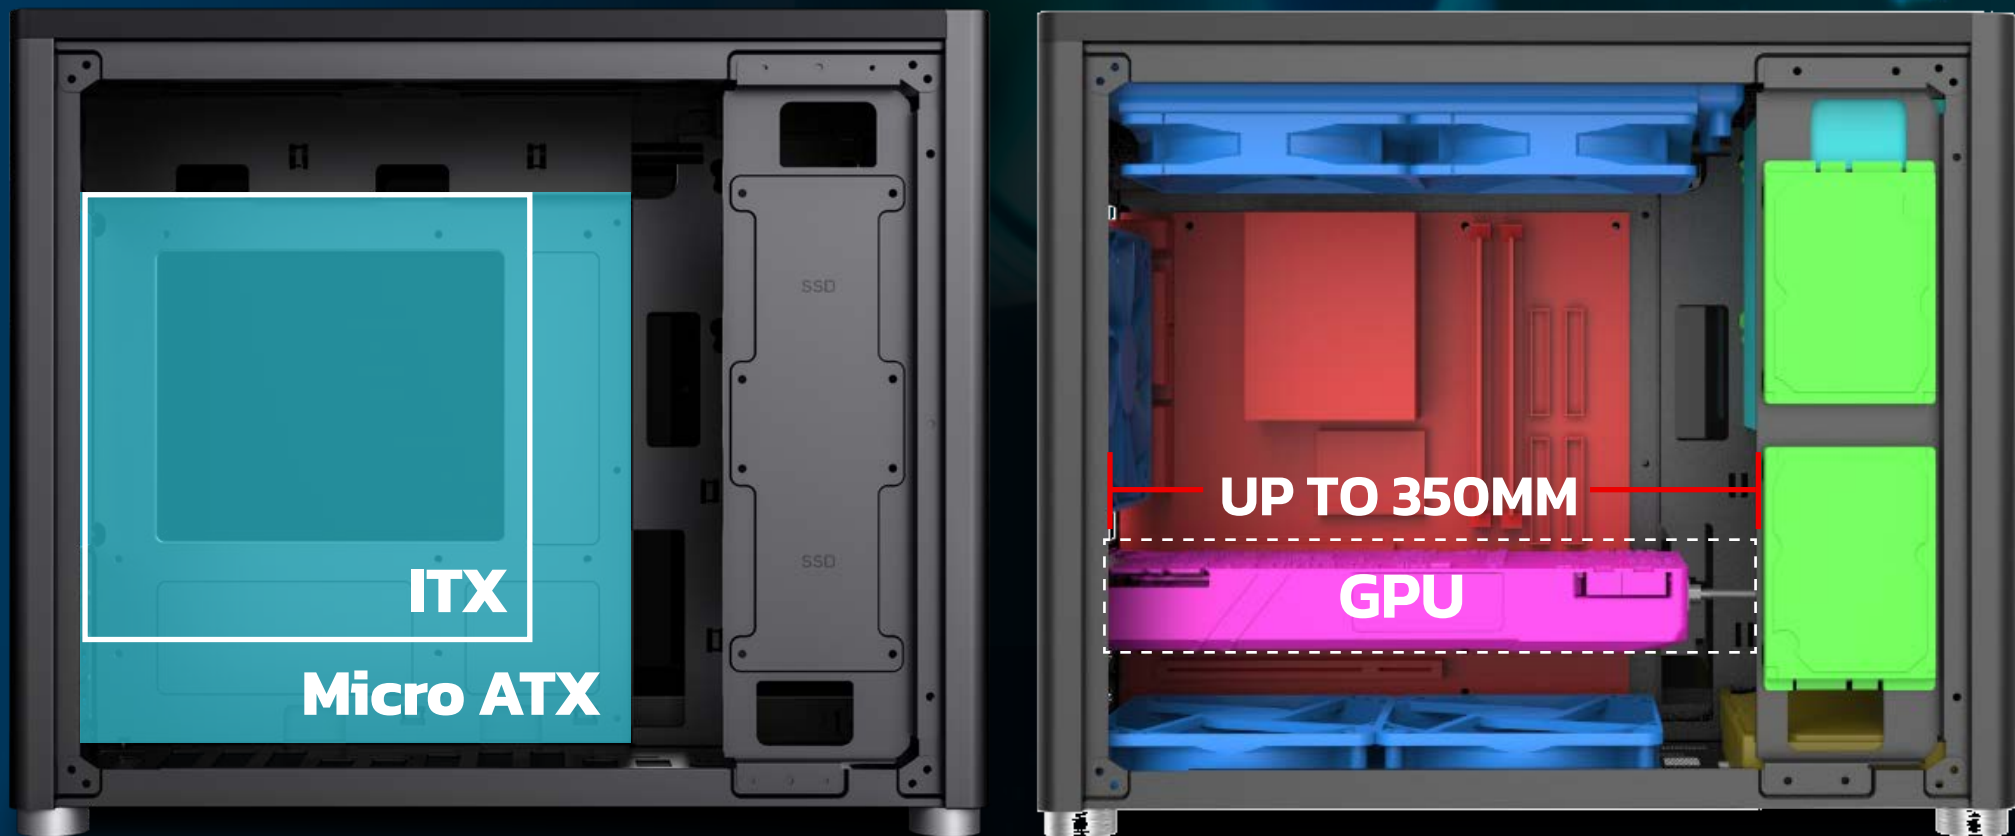

PERFECT SPACE FOR DEMANDING COMPONENTS

For those who constantly seek to push the power of their PC, our **Hussar micro ATX gaming pc case** makes no compromise on performance, compatible with all standard micro ATX and mini ITX motherboards.

1. GPU card Length 305 mm – 355 mm

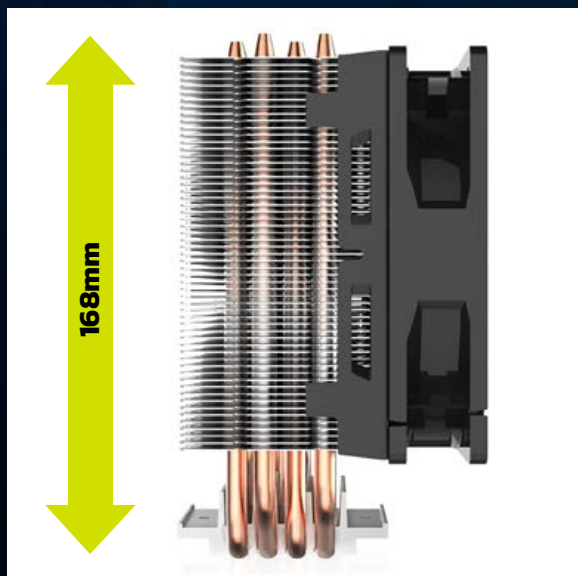

- If PSU length is more than 170 mm the GPU length should be 305 mm.
- If PSU length is less than 170 mm the GPU length should be between 330 mm and 350 mm.

2. Supports 3 slot thickness graphics card.

DESIGNED TO KEEP YOUR POWERFUL BUILD COOL

It can neatly fit a 168 mm tower CPU cooler for optimal performance. If PSU is under 170 mm in length you can fit a whole 3 I/O expansion lot-requiring 350 mm GPU without any issues, and it will still have enough wiggle room for any on-the-fly adjustments you require.

**SUPPORTS 168MM
BIG TOWER CPU COOLER.**

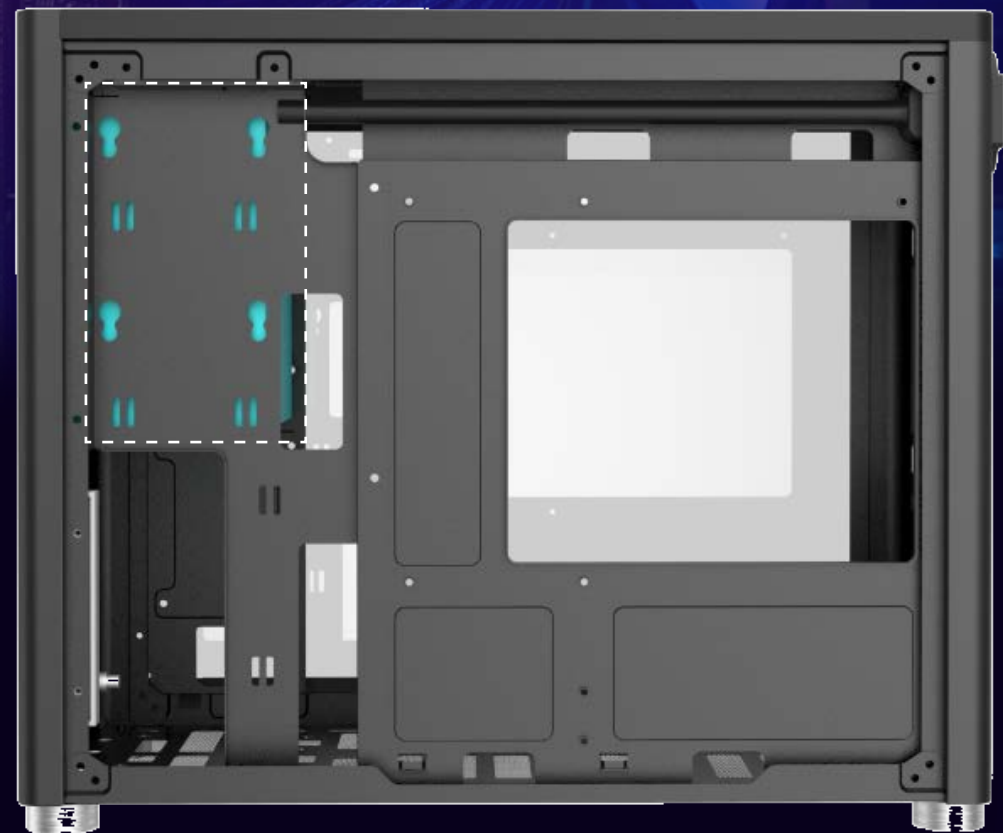

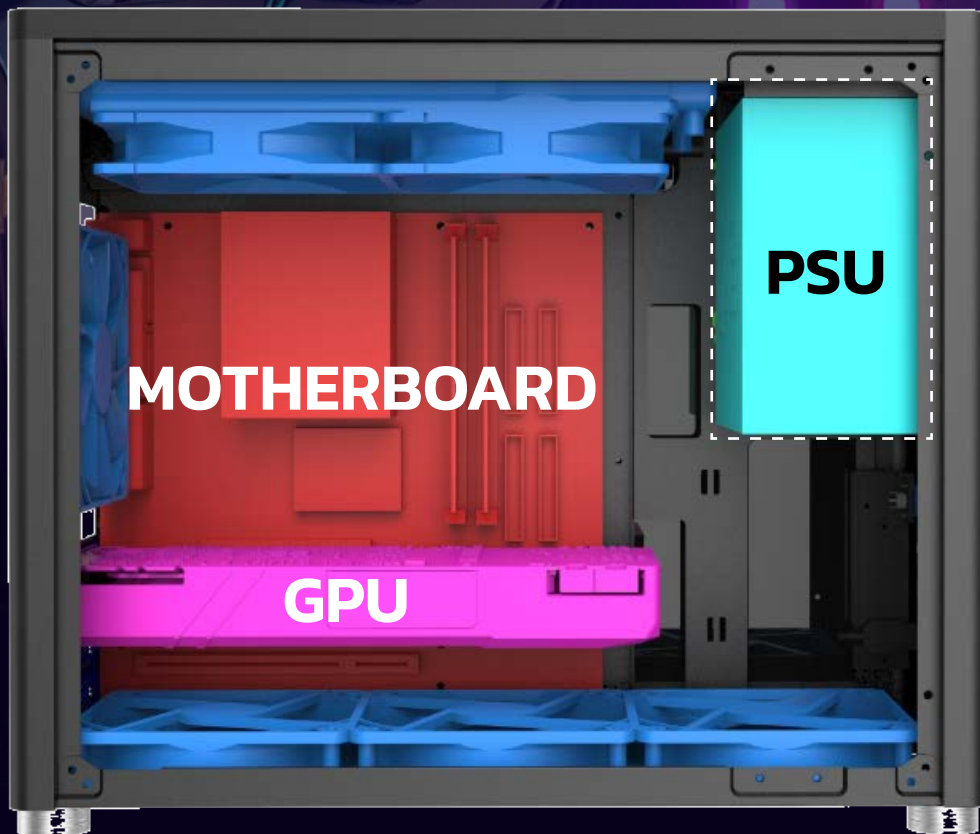

ALL THE POWER IN THE RIGHT SPACE

Remove its cool all-black right-side tempered glass panel to reveal a hidden compartment for all your cables, with a depth of $> 34\text{ mm}$ you can fit them neatly in there and avoid having your rig look cluttered.

1- Support length from 170 mm - 220 mm.

2- ATX PSU fix on front position.

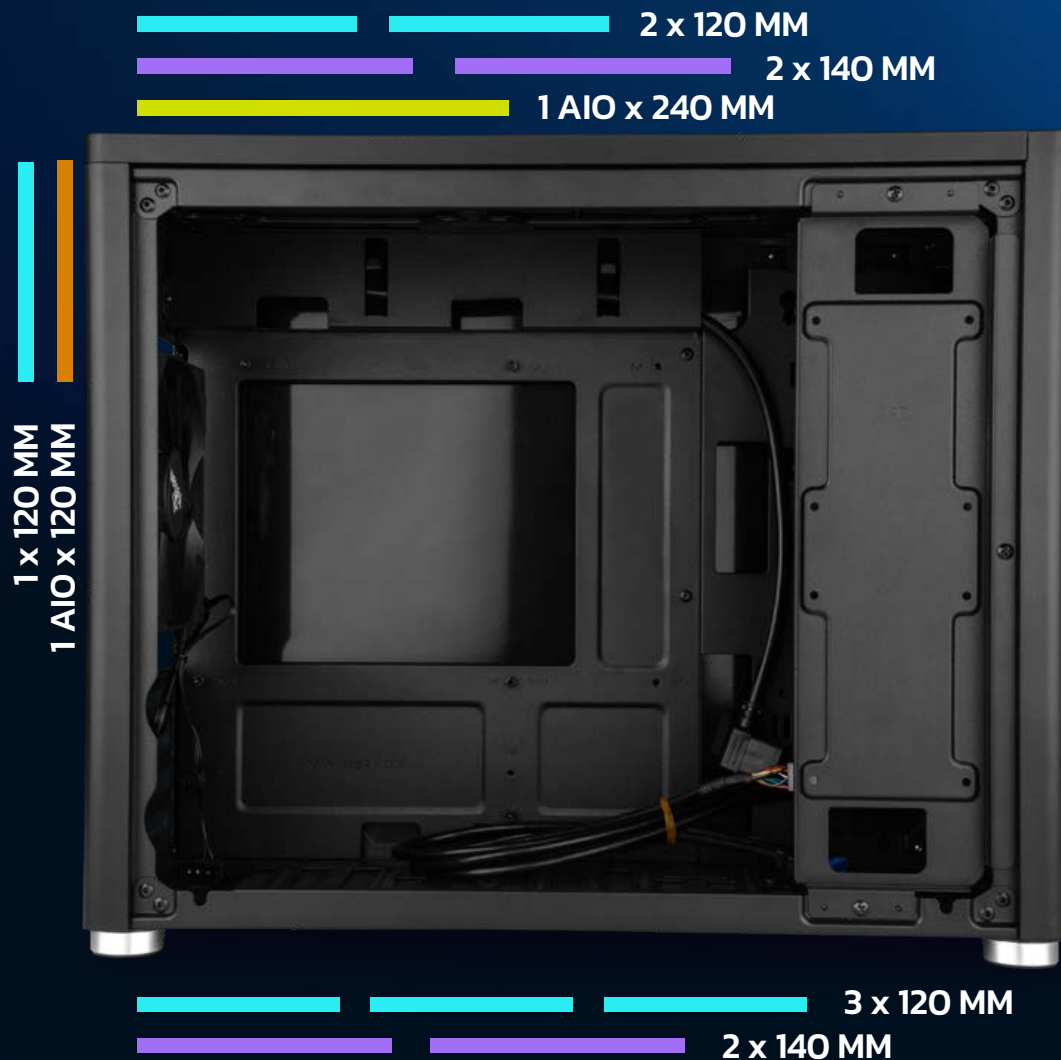

*To be consider GPU Card length, for select PSU.

BUILD THE ULTIMATE GAMING DESKTOP

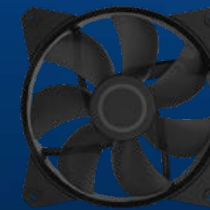

The Hussar case includes support for:

- Two 120 mm or two 140 mm fans on top and one 120 mm fan in the back, or
- One 240 mm AIO water cooling kit fan top and one 120 mm AIO fan in the back, as well as up to three 120 mm fans or two 140 mm fans on bottom.

FAN MOUNTING OPTIONS

AIO 240 MM

KEEP IT MANAGEABLE

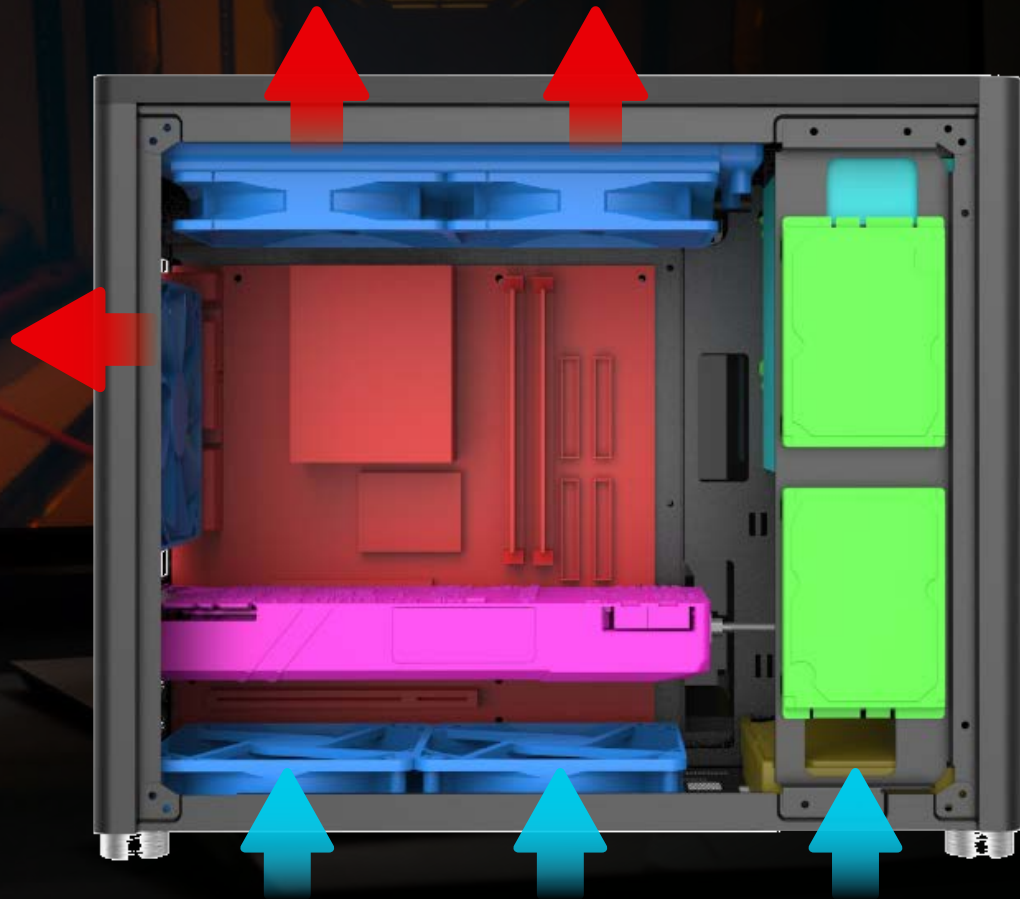

Its small size is no detriment to its storage capabilities, with enough space for two 2.5" SSDs, plus an extra slot for a 2.5" SSD or a 3.5" HDD, you've never seen this much storage in such a compact space.

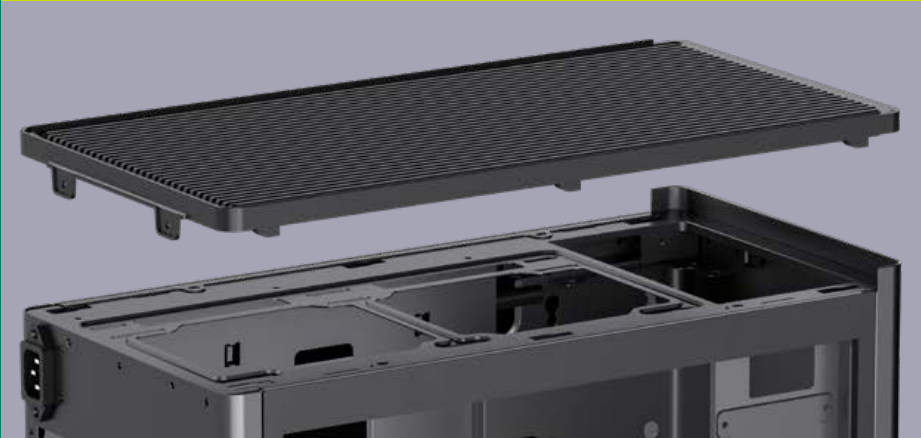

PLANNED AIR FLOW AND LOW TEMPERATURES DESIGN

Completely engineered to give both your GPU and your CPU the air flow and low temperatures they need to run optimally, even when compared to full-ATX systems, this case still delivers an incredible and optimal air flow.

1. Bottom-up airflow can quickly take away heat from internal.
2. The bottom fan position blows directly to the graphics card to optimize cooling performance in maximum.

TOP FULLY DUST FILTER PROTECTION

SLICK, SUPER SLICK

The **Hussar** includes two side tempered glass panels; an enigmatic-looking smoky window with a 70% transparency to show off your build, its smoky tempered glass side window will allow the whole world to see your micro management skills, and a 100% all-black glass side panel that will leave anybody and everybody admiring your futuristic-looking rig and original look.
